HP Financial Services

Leasing makes good business sense in normal times; it makes even better sense in tough economic times to justify the ROI of IT equipment procurement. In any tightening budget situation, leasing your IT solutions means you can expand your buying power and conserve capital.

Fair Market Value (Operating Lease) 100% Funding

Finance Lease 100% Funding

Benefit of Operating Lease

- Avoiding the risks of owning those assets/ solutions.
- With a FMV lease, you are paying for the use of the equipment, not its ownership.
- Technology obsolescence: older technology is expensive to operate and maintain, and also is less efficient.
- FMV Lease establishes a schedule for equipment renewal that can protect you against worries of obsolescence. FMV Lease offers the ability to upgrade or refresh technology as your requirement.
- FMV Lease is a smart, economical solution. At the end of the lease term, simply return the equipment and we can manage disposition safely.

Benefits of Finance leases

- Keep the equipment at the end of the lease term.
- When you choose to finance your equipment rather than buy it, you avoid a large up-front payment.
- By spreading your payments out over the lifecycle of the asset, you are able to align the equipment cost with the benefit derived from that investment.
- Additionally, paying fixed monthly/ quarterly payments means predictable expenses month to month – no surprises - facilitating budget reporting and planning
